

Technical Regulations 2021

Comparison of the changes 2020 – 2021

The following list shows content changes within the 2020 Technical Regulations for 2021. Points for which only the texts have been changed for reasons of clarity are not shown.

2020	2021
-	<p>1.0 Temporary measures against the spread of the SARS-CoV-2 corona virus</p> <p>Due to the SARS-CoV-2 corona virus, the technical regulations will be supplemented by the "Catalog of Measures Protection against Infection" until further notice. The currently valid version can be viewed in the event specific web shop.</p>
<p>3.1.3.1 Exhibitor's own Wi-Fi (WLAN)</p> <p>A Wi-Fi (WLAN) network must operate only in the 2.4 GHz band, not in the 5 GHz band, and comply with the IEEE 802.11g/n standards with a maximum channel width of 20 MHz (144 MB). Hence, only channels 1, 6, and 11 are permissible. Deutsche Messe will assign the channel. The 5 GHz band is reserved for Deutsche Messe to address specific requirements of exhibitors.</p> <p>A Wi-Fi network may be set up for use within the stand only. Its transmitted power must be restricted for this purpose and scope and must not exceed -80 dBm at the stand perimeter.</p> <p>The Wi-Fi may not be accessible by third parties, whereby unsecured network protocols are not permitted.</p> <p>Exhibitors must notify Deutsche Messe of plans to use their own Wi-Fi (for the Internet or other such networks) via the event specific online shop, before the trade fair opens.</p> <p>Deutsche Messe will incorporate the exhibitor's Wi-Fi network into its planned system and prescribe the configuration.</p> <p>Transmitters not designed for Wi-Fi only are forbidden, because they can cause massive interference. If your exhibits use such transmitters, please contact the telecommunications representative (visit the shop). Any Wi-Fi transmitters in exhibits are also subject to the foregoing conditions.</p> <p>Your Wi-Fi network must use an SSID (network name) that clearly identifies your hall and stand number as follows: YourSSID_H27_A01 (where H27 and A01 are the hall and stand numbers).</p> <p>Deutsche Messe will verify compliance with these requirements during the event and during stand setup/dismantling. Noncompliance will cost you a surcharge for late inclusion of your Wi-Fi network into the Deutsche Messe system.</p>	<p>3.1.3.1 Exhibitor's own Wi-Fi (WLAN)</p> <p>A Wi-Fi (WLAN) network must operate only in the 2.4 GHz band, not in the 5 GHz band, and comply with the IEEE 802.11g/n standards with a maximum channel width of 20 MHz (144 MB).</p> <p>A Wi-Fi network may be set up for use within the stand only. 2021

If you do not configure your Wi-Fi as prescribed, you will be asked to do so, and subject to any costs that may be incurred by Deutsche Messe and/or its service partners to perform the task.

In the event your own Wi-Fi network continuously disturbs other networks and/or the one operated by Deutsche Messe, or you do not comply with the above requirements, Deutsche Messe reserves the right to demand deactivation of your network.

In the event of severe breaches and/or continued interference and/or noncompliance with these requirements, the Technical Event Management of Deutsche Messe reserves the right to shut down your Wi-Fi network and Internet connection temporarily or permanently. The costs incurred for such measures, including all attendant costs for the Internet connection and related optional services will be charged to the offending exhibitor.

4.1.1 Noncompliant stand structures

Stand structures, which have not been approved or do not comply with the Technical Regulations or official regulations, may have to be modified or dismantled upon request by Deutsche Messe. If this is not done by the set deadline, Deutsche Messe reserves the right to have the required work carried out at the expense and risk of the exhibitor.

4.10 Noncompliant stand structures

Stand structures, which have not been approved or do not comply with the Technical Regulations or official regulations, may have to be modified or dismantled upon request by Deutsche Messe. If this is not done by the set deadline, Deutsche Messe reserves the right to have the required work carried out at the expense and risk of the exhibitor.

4.7.5 Suspension of objects (extract)

Exhibitors may suspend objects from hall ceilings, upon submitting a request and obtaining approval. In Hall 11, suspensions are almost impossible to install as only a few suspension points are available. No objects can be suspended from ceilings in Halls 8, 9, 18, and 26. Only an authorized service provider of Deutsche Messe may suspend objects from ceilings and/or move/modify the installation.

4.7.5 Suspension of objects (extract)

Exhibitors may suspend objects from hall ceilings, upon submitting a request and obtaining approval. No objects can be suspended from ceilings in Halls 8, 9, 18, and 26. Only an authorized service provider of Deutsche Messe may suspend objects from ceilings and/or move/modify the installation.

5.6.2.3

Supplemental protective measures

The use of stand construction tools, equipment and machinery is subject to recent testing and certification in accordance with the German Ordinance on Industrial Safety and Health (Betriebssicherheitsverordnung – BetrSichV), and no unsecured overhead loads are permitted if persons might be present below. For further regulations concerning overhead loads at events and productions, please refer to “Information 215-313” on overhead loads as issued by the German Social Accident Insurance (Deutsche Gesetzliche Unfallversicherung – DGUV, www.dguv.de).

Furthermore, technical and/or organizational precautions must be taken to rule out the danger of lifted loads, lifting machinery or any attachments thereof descending uncontrollably. This may, for example, involve cordoning off the danger zone, e.g. by means of hose burst protection valves or mechanical latching mechanisms to support hydraulic cylinders.

Exhibitors bear responsibility for safeguarding the safety of their stands and the safe showcasing and operation of all items on exhibit, as well as for providing proof of proper testing and certification. In response to justifiable concerns, Deutsche Messe AG reserves the right to hire a qualified tester/certifier to investigate, at the expense of the exhibitor involved.

5.13

Hygiene of foodstuffs (extract)
